

Thank you for choosing the doctors of Foothill Center for Dental Implants and Oral Surgery. We appreciate your patience and cooperation as we deal with the ever-changing effects of the COVID-19 virus.

We continue to utilize protective measures in accordance with the CDC and the Department of Public Health of California. This includes enhanced personal protective equipment worn by doctors and staff, office waiting room closures for social distancing, new Hepa air filtration systems, UVc air conditioning viral scrubbers and new antiviral environmental fogging technology. Our staff and doctors have been vaccinated for COVID-19 and will be frequently tested.

COVID-19 testing is no longer required prior to consultations or surgery for patients and your accompanying escort. Please limit your accompanying escort to one person.

Once your initial appointment has been made, you will be sent an email confirmation of your appointment and a link to our online registration forms. Please complete and sign the forms and, if possible, include a copy of your medical and dental insurance card, both front and back and your surgical request form from your referral doctor. These forms can also be found in the upper right-hand corner of our website.

The consultation and surgery will ideally occur on the same day. Rest assured that all insurance issues and cost of treatment will be discussed at the time of consultation, prior to surgery. We accept most insurance types for surgery.

As a result of COVID-19, our office waiting rooms are now closed. In our Pasadena and La Canada offices, your car will now serve as your waiting area. Please remain in your car, call our office upon arrival and you will be given further instruction. Remember to always wear a mask and social distance. In our Glendale office we ask you to proceed to the first-floor lobby upon arrival, then call the receptionist for further instruction. Remember to always wear a mask. Escorts will be asked to remain in the lobby as phone signal is weak in the parking garage.

Should you develop any symptoms such as fever, chills, cough, shortness of breath, change in taste or smell, please call the office immediately.

We are excited to have you as a patient and we thank you for your cooperation.
